

## Cross Connection Committee Annual Report 2016

Topics that have been discussed by the committee have been about the NFSA and their legislation to require residential fire sprinklers. The committee had their spokesman Dave Lafond come to speak at one of our meetings and he invited us to see a live burn demonstration which most of us attended. We have been working to come up with a proposal with all of our concerns such as backflow protection, separate services lines, billing, etc and hope to have it drafted soon. We have also learned about changes in the yearly Cross Connection report from CT DPH. The less than 1000 form has changed and will require signature from both surveyor and water operator. We discuss numerous topics every month about new products out there and what type of backflow would be needed, and share different violations we have found to see if other water departments have run into same issues.
